**What we thought:** We were pretty impressed with the sauces we tried from Fortun's Finishing Touch Sauces. Both sauces were delicious! We tried them on steak and chicken straight from the grill and YUM-O! Of course one of the best parts was how easy the prep was and how little clean up there was after the meal:) All we did was warm the sauce in the microwave, pour over the meat and toss out the packaging. There weren't even any leftovers to put away since these sauces were so yummy...everyone cleaned their plates:) The variety of sauces you can find from Fortun's is quite impressive as well. You can find a sauce for nearly every meal...many of them can be multi-purpose for chicken, beef, pork, fish and vegetarian meals so the whole family will be happy:)Fortun's Finishing Touch Sauces make cooking delicious foods for your family a snap and leave you more time to enjoy your family time.
